| P-620 LITHIUM EP COMPLEX | Revised edition no : 01 |
| (DROP POINT 280°C-300°C) | Effective Date: 12-7-2014 |

Product Information

P-620 Lithium EP Complex high temperature grease is a grease that, drop point 280°C-300°C special for high temperature equipment purpose.

Description

A Lithium base high temperature (EP Complex) High Performance Grease in blue colour with additional additives to enhance its stickiness specifically developed for heavy duty equipments in sawmills, plywood mills, palm oil mills, other heavy industrial equipments & heavy duty logging trucks & lorries operating under high temperature on a continuous service basis. Under short-term exposure, it can withstand temperature typically of 280 degree C allows the grease to have a much longer life under extreme conditions. Usable Temperature is 300°C.

Performance

1. It can withstand short-term exposure to high temperature typically of 280 degree C provides incredible resistance to dripping and leaking.
2. Excellent resistance to super high temperature oxidation and prolong the service life of the grease considerably.
3. Superior resistance to softening under high temperature.
4. Above normal protection against water washout, displaces free water and remains a protective on metal surfaces.
5. Extreme pressure properties provide an excellent film strength and load carrying capacity, hence, the bearings can run exceptionally smooth at a temperature much lower than normal.
6. Provides excellent anti-wear and anti-rust properties.

Application

Roller and ball bearings, chassis, wheel bearing and open gear lubrication.

Key Properties

| | | |
|-------------------------------|---|-------------------------------------|
| Product description | : | High Temperature Lithium EP Complex |
| NLGI Grade | : | 3 |
| Structure | : | Extremely smooth |
| Soap Type | : | Lithium EP |
| Colour | : | Blue |
| Penetration at 25 degree C | : | 280°C |
| Short-Term Exposure, Degree C | : | 300°C |
| Usable Temperature Degree C | : | 300°C |
